Noah Mitchell

Creative Technologist · Full-Stack Creative Director

San Diego, CA · noah3d.com · noah@chonkly.com · github.com/AmbiguousX

SUMMARY

Creative technologist who designs and builds interactive 3D worlds, characters and stories for the web. Professional digital artist and musician since 2018, with **150+ works sold on SuperRare** as Ambiguous, and founder of **Chonkly**, a digital art gallery with **500+ artists, 10,000+ artworks and $200K in revenue**. Works across the full stack, from Maya and Blender to Three.js, Convex, Vercel and Claude Code.

SELECTED WORK

noah3d.com/work

The World of Blorb	Interactive animated series: browser-based episodes with real-time 3D characters, cinematic camera direction and a free-camera mode.
Interactive Music Videos	Real-time 3D music videos synced to audio, from character choreography to physics-driven particle scenes.
Character Design	Real-time character rigs with blend-shape faces, physics-driven parts, emotes and dance moves.
Brand Concepts	Personal interactive concept pieces built around consumer brands such as M&M's, Oreo and Mtn Dew.

EXPERIENCE

Founder & Creative Director, Chonkly

April 2025 – Present

San Diego, CA

- Founded **Chonkly**, a digital art gallery that grew to **500+ artists** and **10,000+ artworks** and generated **$200K in revenue**.
- Designed and built the product end to end: front end, Convex backend, storage, security and deployment on Vercel.
- Built AI-powered visual search for the gallery: image embeddings and similarity search that power Google-Images-style reverse image search across the collection.
- Extended the Chonkly ecosystem with connected products: **GridChonk** (image boards), **ChonkVerse** (multiplayer social shopping) and **ChonkPlex** (desktop video-clipping app).

Independent Digital Artist & Musician

2018 – Present

- Sold **150+ original works** to **80+ collectors** on SuperRare as **Ambiguous**, and write and release original music on Spotify as **AmbiguousX**.

SKILLS

Creative	Character design · 3D modeling, rigging & animation (Maya, Blender) · Interactive storytelling · Creative direction · Music production
Engineering	JavaScript / TypeScript · Three.js / WebGL · React / Next.js · Node.js · Convex · Vercel · Cybersecurity · Blockchain
AI	Agentic programming & deployment (Claude Code) · Embeddings & similarity search · Reverse image search · Generative image (Grok) · AI-assisted production pipelines
